Experience

AWS Student Builder Group Leader | *Next.js, FastAPI, Supabase, AWS, Cloudflare*

Feb 2025 - May 2026

AWS Student Builder Group

- Led end-to-end development and maintenance of full-stack platforms using Next.js, FastAPI, Supabase, AWS, and Cloudflare, owning architecture, backend services, APIs, and operational workflows.
- Deployed production systems for registration, attendance, and digital operations, supporting 800+ attendees across AWS Student Builder initiatives and events.

Full Stack Developer (Freelance) | *FastAPI, Next.js, PostgreSQL, Docker*

Apr 2025 - Nov 2025

FounDev Studio

- Built 4 production-grade full-stack applications and REST APIs using FastAPI, Next.js and Docker for 3+ international business clients.
- Developed authentication, authorization, RBAC dashboards, and payment integrations while deploying and monitoring production systems for reliability and performance.

Projects

CyniGPT | *Python, PyTorch, SentencePiece*

Aug 2026 - Present

- Designed a 7.4M-parameter Transformer language model using Python, PyTorch, and a custom SentencePiece tokenizer.
- Implemented multi-head self-attention, causal masking, positional embeddings, and autoregressive text generation.
- Built the end-to-end language modeling pipeline integrating custom tokenization, neural network components, and autoregressive inference.
- Repository : github.com/shashankpandey04/CyniGPT

CommuteFlow | *Java, Spring Boot, Spring Security, PostgreSQL*

Jul 2026 - Aug 2026

- Built an Uber-inspired corporate commute platform enabling organizations to manage employees, drivers, vehicles, pickup points, routes, trips, and employee ride bookings through a unified backend.
- Engineered the complete ride lifecycle from trip creation and vehicle/driver assignment to employee booking and ride events, with capacity, availability, and booking constraints enforced at the service layer.
- Implemented secure multi-tenant access using JWT, Spring Security, and role-based authorization & organization-scoped resources.
- Live Link: github.com/shashankpandey04/CommuteFlow

CYNI Platform | *FastAPI, Next.js, MongoDB, Redis*

Jan 2023 - May 2026

- Developed a scalable full-stack community management platform supporting 40,000+ active users across 300+ servers using FastAPI, Next.js, MongoDB, and Redis.
- Architected backend services and REST APIs for moderation, ticketing, management, applications and community automation.
- Optimized Redis caching and database operations, reducing response times from 4–5s to 1–2s, 2–3s to 1–2s, and 500ms to 200ms across key workflows.
- Repository : github.com/shashankpandey04/CYNI

Certificates / Certifications

AWS Certified Cloud Practitioner

Jul 2026

Amazon Web Services - Certificate Link

AWS Cloud Practitioner Essentials

Dec 2024

Amazon Web Services - Certificate Link

Skills

Languages: Python, Java, JavaScript, PHP

Frontend: Next.js, React.js, Tailwind CSS

Backend: FastAPI, Django, Flask, Node.js, Spring Boot, Laravel, REST APIs, JWT, OAuth 2.0, RBAC, Authentication & Authorization

AI/ML: PyTorch, Transformer Models, SentencePiece, Natural Language Processing, Autoregressive Text Generation

Databases & Infrastructure: PostgreSQL, MongoDB, MySQL, Redis, Docker, AWS, Linux

Education

Lovely Professional University

2023 - 2027

Bachelor of Technology - Computer Science and Engineering - CGPA: 7.78

Phagwara, Punjab
